Project Design Phase-I
Proposed Solution Template

Date	08 March 2026
Team ID	
Project Name	***Visualizing Housing Market Trends using Tableau & Flask***
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Real estate professionals find it difficult to analyze housing price trends because housing datasets contain many variables such as bedrooms, bathrooms, floors, house age, and renovation details.
2.	Idea / Solution description	Develop a Flask-based web application integrated with Tableau dashboards to visualize housing data and provide insights such as price trends and house feature comparisons.
3.	Novelty / Uniqueness	Combines data analysis with interactive Tableau dashboards and a Flask web interface to make housing market insights easy to explore.
4.	Social Impact / Customer Satisfaction	Helps analysts and investors understand housing trends easily, improving decision-making and reducing manual data analysis.
5.	Business Model (Revenue Model)	Revenue can be generated through subscription-based dashboard access and premium real estate analytics services.
6.	Scalability of the Solution	The platform can scale by adding larger datasets, integrating machine learning models, and deploying the system on cloud infrastructure.
